"Powering the Energy Revolution:  
Your Trusted Industrial Service provider"

## SKILLED MANPOWER PROVIDER FOR ONSHORE, OFFSHORE AND MARINE OPERATIONS

United Advanced provides reliable and skilled manpower supplies for onshore, offshore, and marine operations. We understand the critical importance of having competent and qualified personnel to ensure the smooth execution of projects and operations. Our manpower supplies encompass a wide range of positions and expertise, including but not limited to:

### 1. PROJECT MANAGERS

Experienced project managers oversee and coordinate onshore operations, ensuring project timelines, budgets, and quality objectives are met. They possess strong leadership skills and industry knowledge to effectively manage project teams and deliver successful outcomes.

### 3. SUPERVISORS

Our supervisors oversee onshore activities, ensuring work is carried out efficiently, safely, and according to project specifications. They monitor progress, coordinate resources, and provide guidance to workers, ensuring projects are completed on time and within budget.

### 2. ENGINEERS

We have a team of engineers specializing in various disciplines, including civil, mechanical, electrical, and instrumentation engineering. They provide technical expertise, design solutions, and support on onshore projects, such as construction, maintenance, and infrastructure development.

### 4. RIGGERS

Our team of riggers is experienced in handling rigging equipment, lifting operations, and ensuring the safe movement and positioning of heavy loads on offshore installations. They are knowledgeable about rigging procedures, safety regulations, and equipment maintenance.

## 5. SAFETY PERSONNEL

Safety is of paramount importance in the oil and gas industry, both offshore and onshore. We offer experienced safety personnel who ensure compliance with safety regulations, implement safety programs, conduct risk assessments, and promote a culture of safety throughout onshore operations.

## 7. WELDERS

We have a team of skilled welders who possess the expertise to perform various welding techniques, including SMAW (Shielded Metal Arc Welding), GTAW (Gas Tungsten Arc Welding), and GMAW (Gas Metal Arc Welding). They adhere to strict quality standards and safety practices while carrying out welding operations.

## 9. CRANE OPERATORS

Our crane operators are trained professionals who operate cranes and lifting equipment to facilitate material handling and equipment installation on offshore installations. They are proficient in operating different types of cranes and follow safety protocols to ensure safe and efficient operations.

## 11. ELECTRICIANS

We have qualified electricians who are well-versed in electrical systems and installations on offshore facilities. They can handle electrical maintenance, troubleshooting, and repairs to ensure the smooth operation of electrical systems, equipment, and machinery.

## 6. QUALITY CONTROL / QUALITY ASSURANCE PERSONNEL

Our Quality Control / Quality Assurance Personnel are meticulous and detail-oriented professionals who possess in-depth knowledge of quality control processes and methodologies. They are responsible for implementing and enforcing stringent quality standards across all phases of our operations.

## 8. SCAFFOLDERS

Our scaffolders are experts in erecting and dismantling scaffolding structures to facilitate work at heights. They have the necessary training and expertise to ensure the safety and stability of scaffolds, enabling workers to perform their tasks effectively and securely.

## 10. TECHNICIANS

Our team of technicians comprises skilled professionals with expertise in various disciplines, such as mechanical, instrumentation, HVAC (Heating, Ventilation, and Air Conditioning), and more. They provide technical support, equipment maintenance, and troubleshooting services to keep offshore operations running smoothly.

## 12. SUPPORT STAFF

We provide administrative and logistical support staff to assist with project management, document control, procurement, and other essential functions required for smooth onshore operations.

Our onshore manpower services are tailored to meet the specific needs of your projects. We ensure that our professionals possess the required skills, certifications, and experience to perform their roles effectively. By partnering with United Advanced for onshore manpower, you can access a reliable pool of skilled professionals who are committed to delivering high-quality results and contributing to the success of your onshore projects.

### OUR VESSEL FLEET

United Advanced takes pride in its diverse and well-maintained vessel fleet. Our fleet includes a range of vessels suitable for various offshore operations, such as Anchor Handling Tug Supply (AHTS) vessels, Platform Supply Vessels (PSVs), Multi-Purpose Support Vessels (MPSVs), and Accommodation Support Vessels (ASVs). Each vessel is equipped with state-of-the-art technology, safety features, and specialized equipment to meet the unique demands of offshore projects.

### OFFTAKE SUPPORT

United Advanced has expertise in providing offtake support for offshore installations. We offer efficient and safe offloading services for transferring cargo, supplies, and equipment between vessels and installations. Our experienced personnel and well-maintained equipment ensure smooth and timely offloading operations, minimizing downtime and optimizing productivity.

### VESSEL SERVICES

We offer comprehensive vessel services to support offshore operations. Our skilled crew and technical staff ensure the smooth operation of vessels, including navigation, positioning, cargo handling, and maintenance. We prioritize safety and efficiency, ensuring that vessels are fully equipped and staffed to provide reliable and high-quality services to our clients.

### SUPPLY OPERATIONS – DRILLING & PRODUCTION

We specialize in supporting drilling and production activities. Our supply operations ensure a steady flow of essential equipment, materials, and provisions to offshore installations, including drilling rigs, production platforms, and FPSOs (Floating Production Storage and Offloading vessels). We have the capability to handle complex logistical challenges and provide efficient supply chain solutions to support uninterrupted operations.

United Advanced plays a vital role in supporting offshore construction projects. We provide a range of services, including transportation of construction materials, equipment, and personnel, as well as assisting with installation, hook-up, and commissioning activities. Our experienced team and well equipped vessels ensure safe and efficient support for construction projects, contributing to their successful completion.

### **SEISMIC & SURVEY SUPPORT**

We have expertise in providing support for seismic and survey operations. Our vessels are equipped with advanced survey equipment and experienced personnel to assist in conducting seismic surveys, bathymetric surveys, geotechnical investigations, and other survey-related activities. We ensure precise data acquisition and efficient survey operations to support offshore exploration and development projects.

### **ACCOMMODATION SUPPORT**

We understand the importance of providing comfortable and safe accommodation for offshore personnel. Our Accommodation Support Vessels (ASVs) offer high-quality living quarters, catering facilities, recreational areas, and other amenities to ensure a pleasant living environment for the workforce. We prioritize the well-being and welfare of offshore personnel, providing them with a comfortable home away from home.

### **INSTALLATION SUPPORT**

We specialize in providing support during offshore installation projects. Whether it's the installation of platforms, pipelines, subsea structures, or equipment, our experienced personnel and well-equipped vessels ensure safe and efficient installation operations. We handle all aspects of installation support, including transportation, positioning, lifting, and securing of assets.

### **TUG & BARGE OPERATIONS**

United Advanced offers reliable and efficient tug and barge operations. We provide towing and transportation services for cargo, equipment, and structures between onshore and offshore locations. Our experienced tugboat crews and well-maintained barges ensure safe and timely transportation, contributing to the smooth execution of offshore projects.

### **DIVE & ROV SUPPORT**

United Advanced provides comprehensive support for dive and remotely operated vehicle (ROV) operations. Our experienced dive teams and well-equipped vessels offer underwater inspection, maintenance, and repair services. We also support ROV operations for subsea inspections, surveys, and intervention tasks. Our dive and ROV support services ensure the integrity and reliability of underwater assets and infrastructure.

### **INSPECTION, MAINTENANCE & REPAIR**

United Advanced offers comprehensive inspection, maintenance, and repair services for offshore

United Advanced offers civil construction services, catering to various sectors and industries. Our civil construction capabilities encompass a wide range of projects, including infrastructure development, commercial and residential buildings, industrial facilities, and more. With our expertise and experience, we strive to deliver high-quality construction solutions that meet the specific needs and requirements of our clients.

# CIVIL CONSTRUCTION SERVICES

United Advanced hold fully functional inhouse experienced Engineering, Project management and site construction professional to handle every awarded EPC projects.

## 1. SITE PREPARATION AND EARTHWORKS

We handle site preparation activities such as land clearing, excavation, grading, and soil stabilization. Our experienced team ensures that the site is properly prepared to accommodate the construction project.

## 3. MEP (MECHANICAL, ELECTRICAL, PLUMBING) INSTALLATIONS

We have expertise in installing and integrating mechanical, electrical, and plumbing systems for various construction projects. Our team ensures proper installation, functionality, and compliance with safety regulations and standards.

## 5. LANDSCAPING AND EXTERNAL WORKS

We offer landscaping services to create attractive and functional outdoor spaces. This includes designing and implementing green spaces, hardscaping, irrigation systems, and other external features.

## 2. STRUCTURAL CONSTRUCTION

We specialize in constructing durable and robust structures, including buildings, bridges, roads, and other infrastructure elements. Our construction team follows industry best practices and adheres to quality standards to ensure structural integrity and longevity.

## 4. FINISHING AND INTERIOR WORKS

We provide finishing and interior works that enhance the aesthetics and functionality of the constructed spaces. This includes flooring, painting, tiling, partitioning, ceilings, and other interior finishes.

At United Advanced, we bring together a skilled workforce, modern construction techniques, and a commitment to excellence to deliver successful civil construction projects. Whether it's a small-scale development or a large-scale infrastructure project, we strive to exceed client expectations by delivering projects on time, within budget, and to the highest quality standards.
